

Containers

For Sterilization and Storage

Sterilization and storage

Containers

For sterilization and storage of pipettes, pipette tips, glasses and other

Containers for sterilization are used in all areas, where pipettes, Petri dishes, pipette tips, test tubes, culture tubes or other small parts made of glass or plastic have to be sterilized or stored in a sterile environment.

The wide range of our programme of containers for sterilization surely offers an economically useful solution for your working field as well.

UNICON

UNICON Universal containers

For sterilization and storage of pipette tips and all other small parts made of glass or plastic that have to be sterilized or stored in a sterile environment.

UNICON are round and provide a comfortable slip-over lid, that may only be attached loosely during the autoclaving process. They are made of pure aluminium.

UNICON 1
i.e. for centrifuge glasses,
UNICON 2
i.e. for test tubes,
UNICON 3
i.e. for pipette tip inserts,
UNICON 4
i.e. for small parts made of glass or plastic.

Pipette tip racks

Various racks for the insertion of blue, yellow and crystal pipette tips in UNICON 3. After the sterilization, the tips can easily be taken from the racks.

The arrangement of the tips even makes it possible to take them with a multi-channel pipette.

VARICON

VARICON Variable pipette containers

This economically-priced pipette container is made of two overlapping aluminium parts.

According to the length of the pipettes the lid can be slid over the lower part, so that pipettes of different volume can be sterilized and stored.

That means only one container size is needed for all standard pipettes of 280 to 420 mm length and only one size for all short or pasteur pipettes of 145 to 235 mm length.

GESTICON

GESTICON **Racks for pipette containers**

For round pipette containers VARI-
CON or square containers with
dimensions up to 65 x 65 mm.

Pipettes of different sizes are
ready to hand at your working
place respectively in your safety
workbench.

GESTICON is available in three
sizes.

Stainless steel racks with fixed
inclination to hold 4, 6 or 8 round
or square pipette containers.

SILICON

SILICON **Silicone inserts**

For insertion into the pipette con-
tainers VARICON RS and RK.

SILICON prevents from damaging
pipettes by sudden shocks. They
are made of 2 mm thick silicone
rubber and highly elastic.

SILICON has a diameter of 58 mm
and fits in the lower part of
VARICON RS and RK.

Technical Data/Ordering Information**Cat.-No.****UNICON**

UNICON 1	115 mm height	Ø 120 mm	3.526 113
UNICON 2	175 mm height	Ø 120 mm	3.526 173
UNICON 3	170 mm height	Ø 170 mm	3.526 183
UNICON 4	270 mm height	Ø 170 mm	3.526 273

Pipette tip rack

Rack b	for 116 blue pipette tips		3.527 013
Rack g	for 208 yellow pipette tips		3.527 023
Rack c	for 208 crystal pipette tips		3.527 033

VARICON

VARICON RK	145-235 mm length (variable)	Ø 60 mm	3.521 233
VARICON RS	280-420 mm length (variable)	Ø 60 mm	3.521 423

GESTICON

GESTICON E4	195 x 229 x 235 mm (w x h x d)	stainless steel	3.524 042
GESTICON E6	195 x 315 x 235 mm (w x h x d)	stainless steel	3.524 062
GESTICON E8	195 x 405 x 235 mm (w x h x d)	stainless steel	3.524 182

SILICON

SILICON	2 mm height	Ø 58 mm	3.523 213
